**60<sup>th</sup> Small Business and Industry Outreach  
Initiative Symposium (SBIOI)**

20 April 2022

# Naval Information Warfare Center Atlantic

## Expeditionary Warfare (ExW) Department

Charleston Defense Industry Association  
**60<sup>th</sup> Small Business and Industry  
Outreach Initiative Symposium**  
20 April 2022

**Ashlee Landreth, SSTM**  
NIWC Atlantic  
ExW Department Head

# Agenda

- ▼ Organizational Structure
- ▼ Strategic Guidance
  - NAVWAR Strategic Vector
  - Marine Corps Strategic Guidance
  - SOCOM Strategic Guidance
- ▼ 2022 Priorities
  - Marine Corps Priorities
  - SOCOM Priorities

## Expeditionary Warfare Department FY21: 639 FTEs — 73 Projects — 20 IPTs

ExW Department — Rapidly delivering C4ISR, Cyber and IT systems and engineering services to meet the Information Warfare needs of the Marine Corps and Special Operations Command.

# Expeditionary Warfare Department

## Enabling Commanders in Faster Decision-Making

Expeditionary  
Warfare

Ashlee Landreth, SSTM

### Divisions

Expeditionary  
Intelligence Solutions

Expeditionary  
Enterprise Systems  
& Services

Land Systems  
Integration

Expeditionary  
Command, Control and  
Communications  
Solutions

**Expeditionary Warfare** *FY21: 639 FTEs — 73 Projects — 20 IPTs*

**Rapidly delivering C4ISR, Cyber and IT systems and engineering services to meet the IW needs of the Marine Corps and Special Operations Command.**

- Deliver IW capabilities to the USMC and SOCOM
- Provide full spectrum C4ISR systems and services to Marines and Special Forces.
- Supporting Wargaming & Experimentation
- Deliver Capabilities that Enable Successful Stand In Forces
- Enable Joint All Domain Integration
- Ensuring S&T/R&D Progression

Lightening the load for  
Marine Intel Units —  
Demonstrating satellite  
surrogate technology for  
Marines — Helping  
Marines achieve Space  
Force Certification for  
next-generation GPS —  
Creating compact,  
removable Networking on  
the Move technology for  
the Marine Corps —  
Bringing DevSecOps to  
Marine Corps (MCBOSS)

### Major Sponsors

▪ MARCORSYSCOM

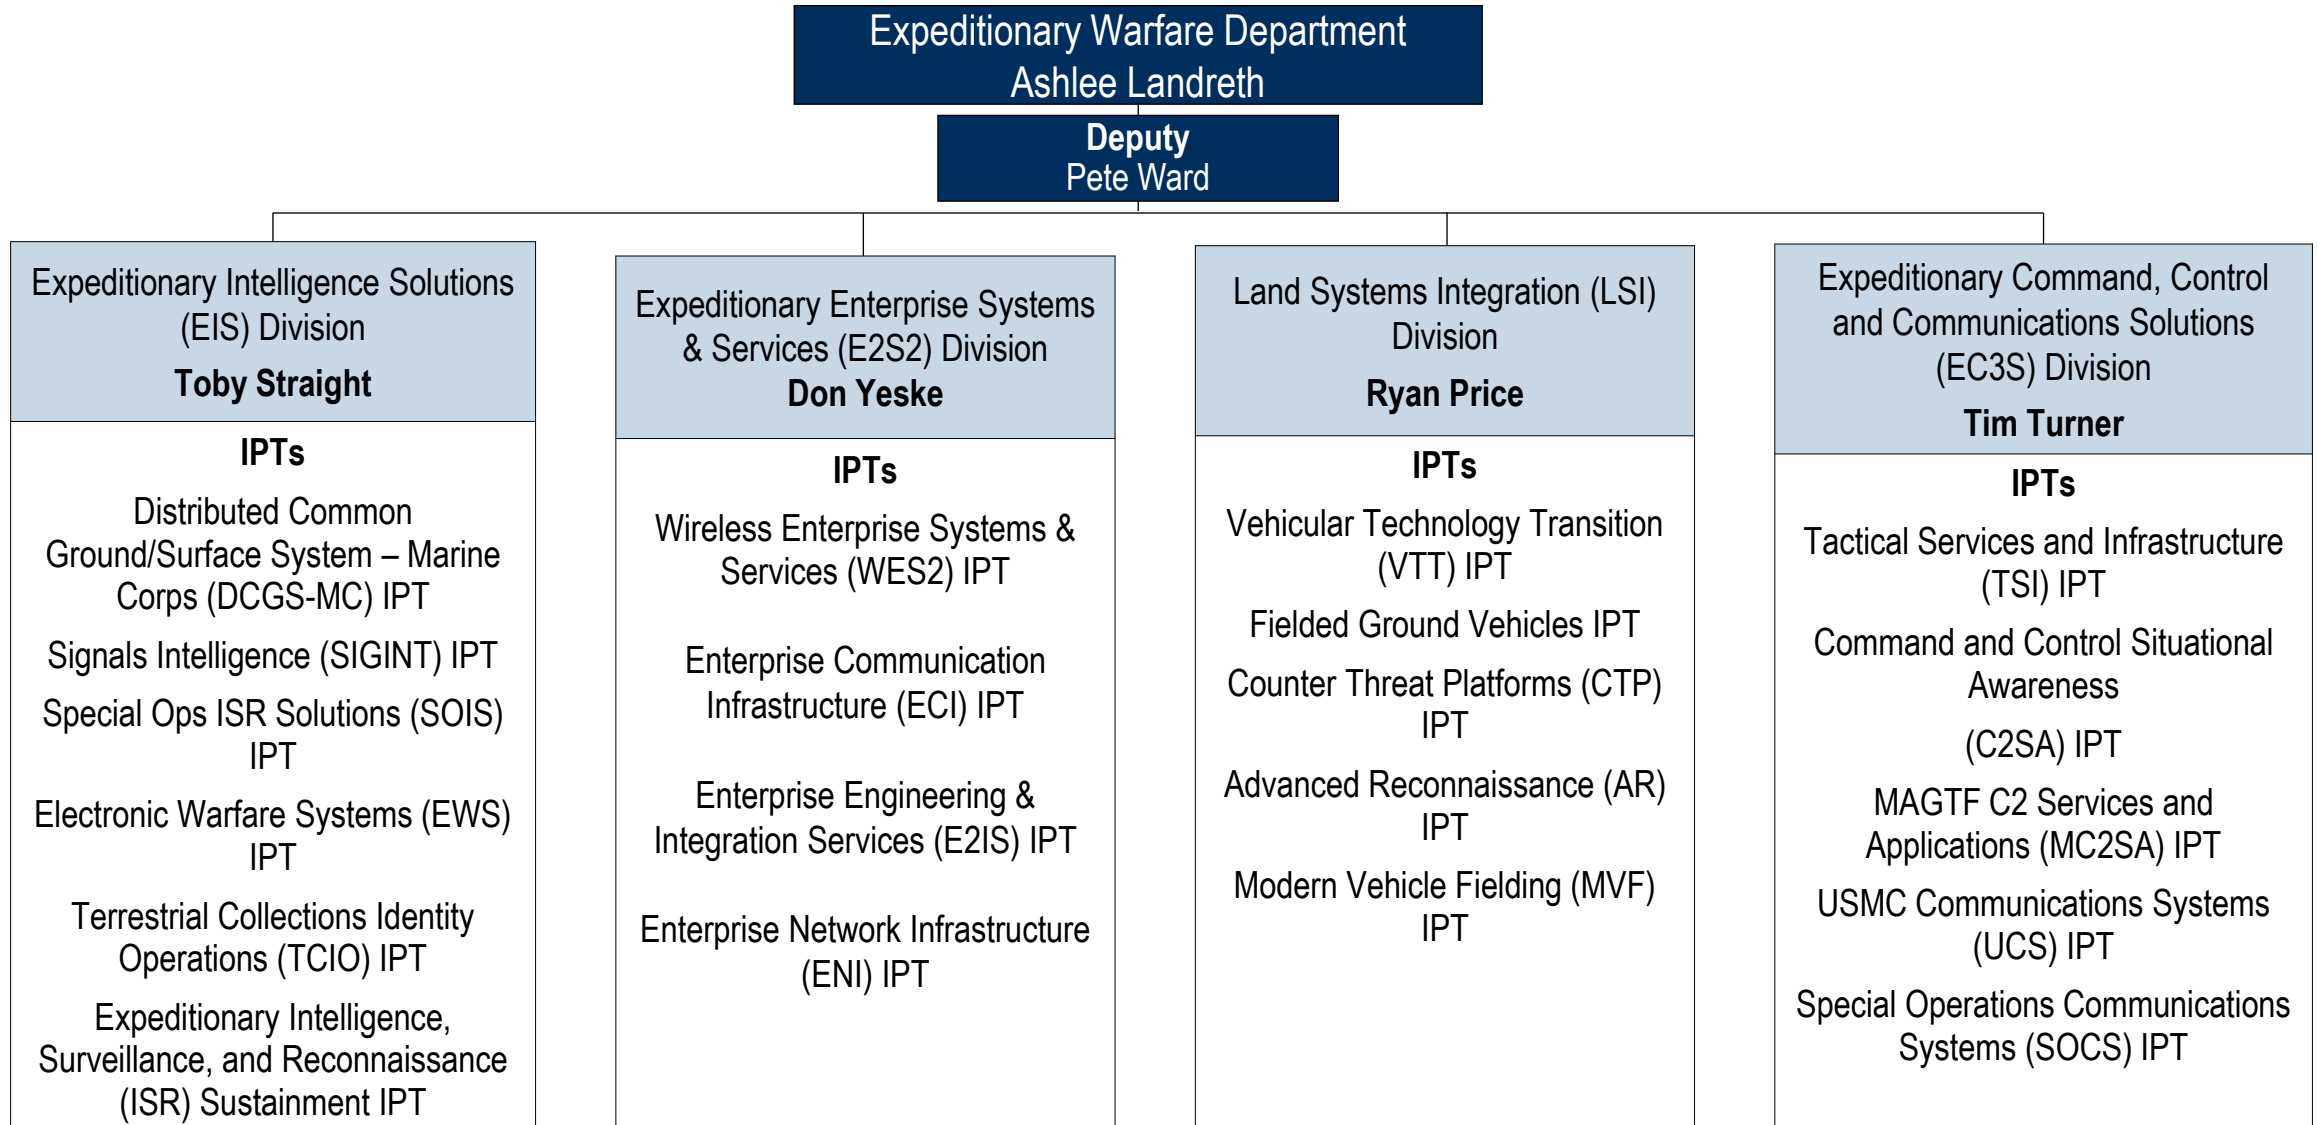

▪ SOCOM

▪ HQMC

▪ PEO Land Systems

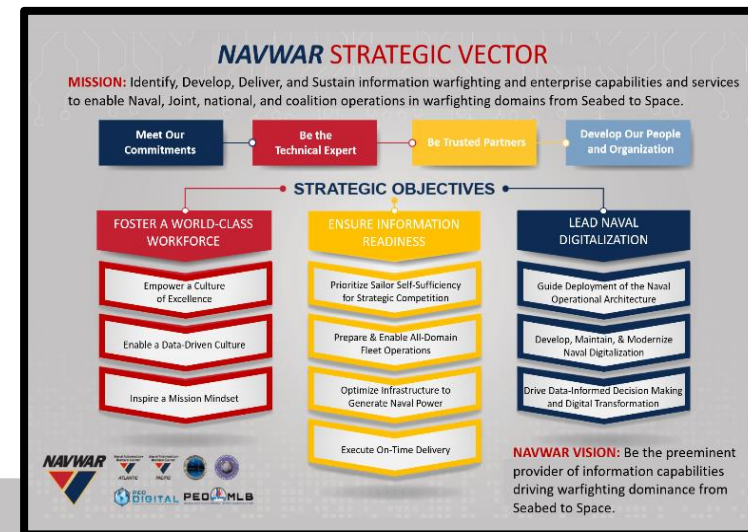

# Organizational Structure

# NIWC Atlantic's Strategic Framework

## Aligns to Higher Strategic Guidance & NAVWAR Strategic Vector

### NAVWAR Strategic Objectives: Foster a World-class Workforce

#### Cultivate a Winning Team:

Cultivate a winning workforce rooted in our core values, with a deep understanding and connection of the warfighter and each other.

- I. Engage the Workforce in Meaningful Ways
- II. Optimize the Workforce
- III. Increase Connectedness

### Ensure Information Readiness

#### Deliver Competitive Advantages to the Warfighter:

Maintain and deliver the most critical information warfare solutions that the warfighter needs to win today, while developing capabilities for the future force.

- I. Prioritize Mission Critical Work
- II. Deliver Ready, Advanced Naval Solutions, On Time
- III. Reimagine Naval Power

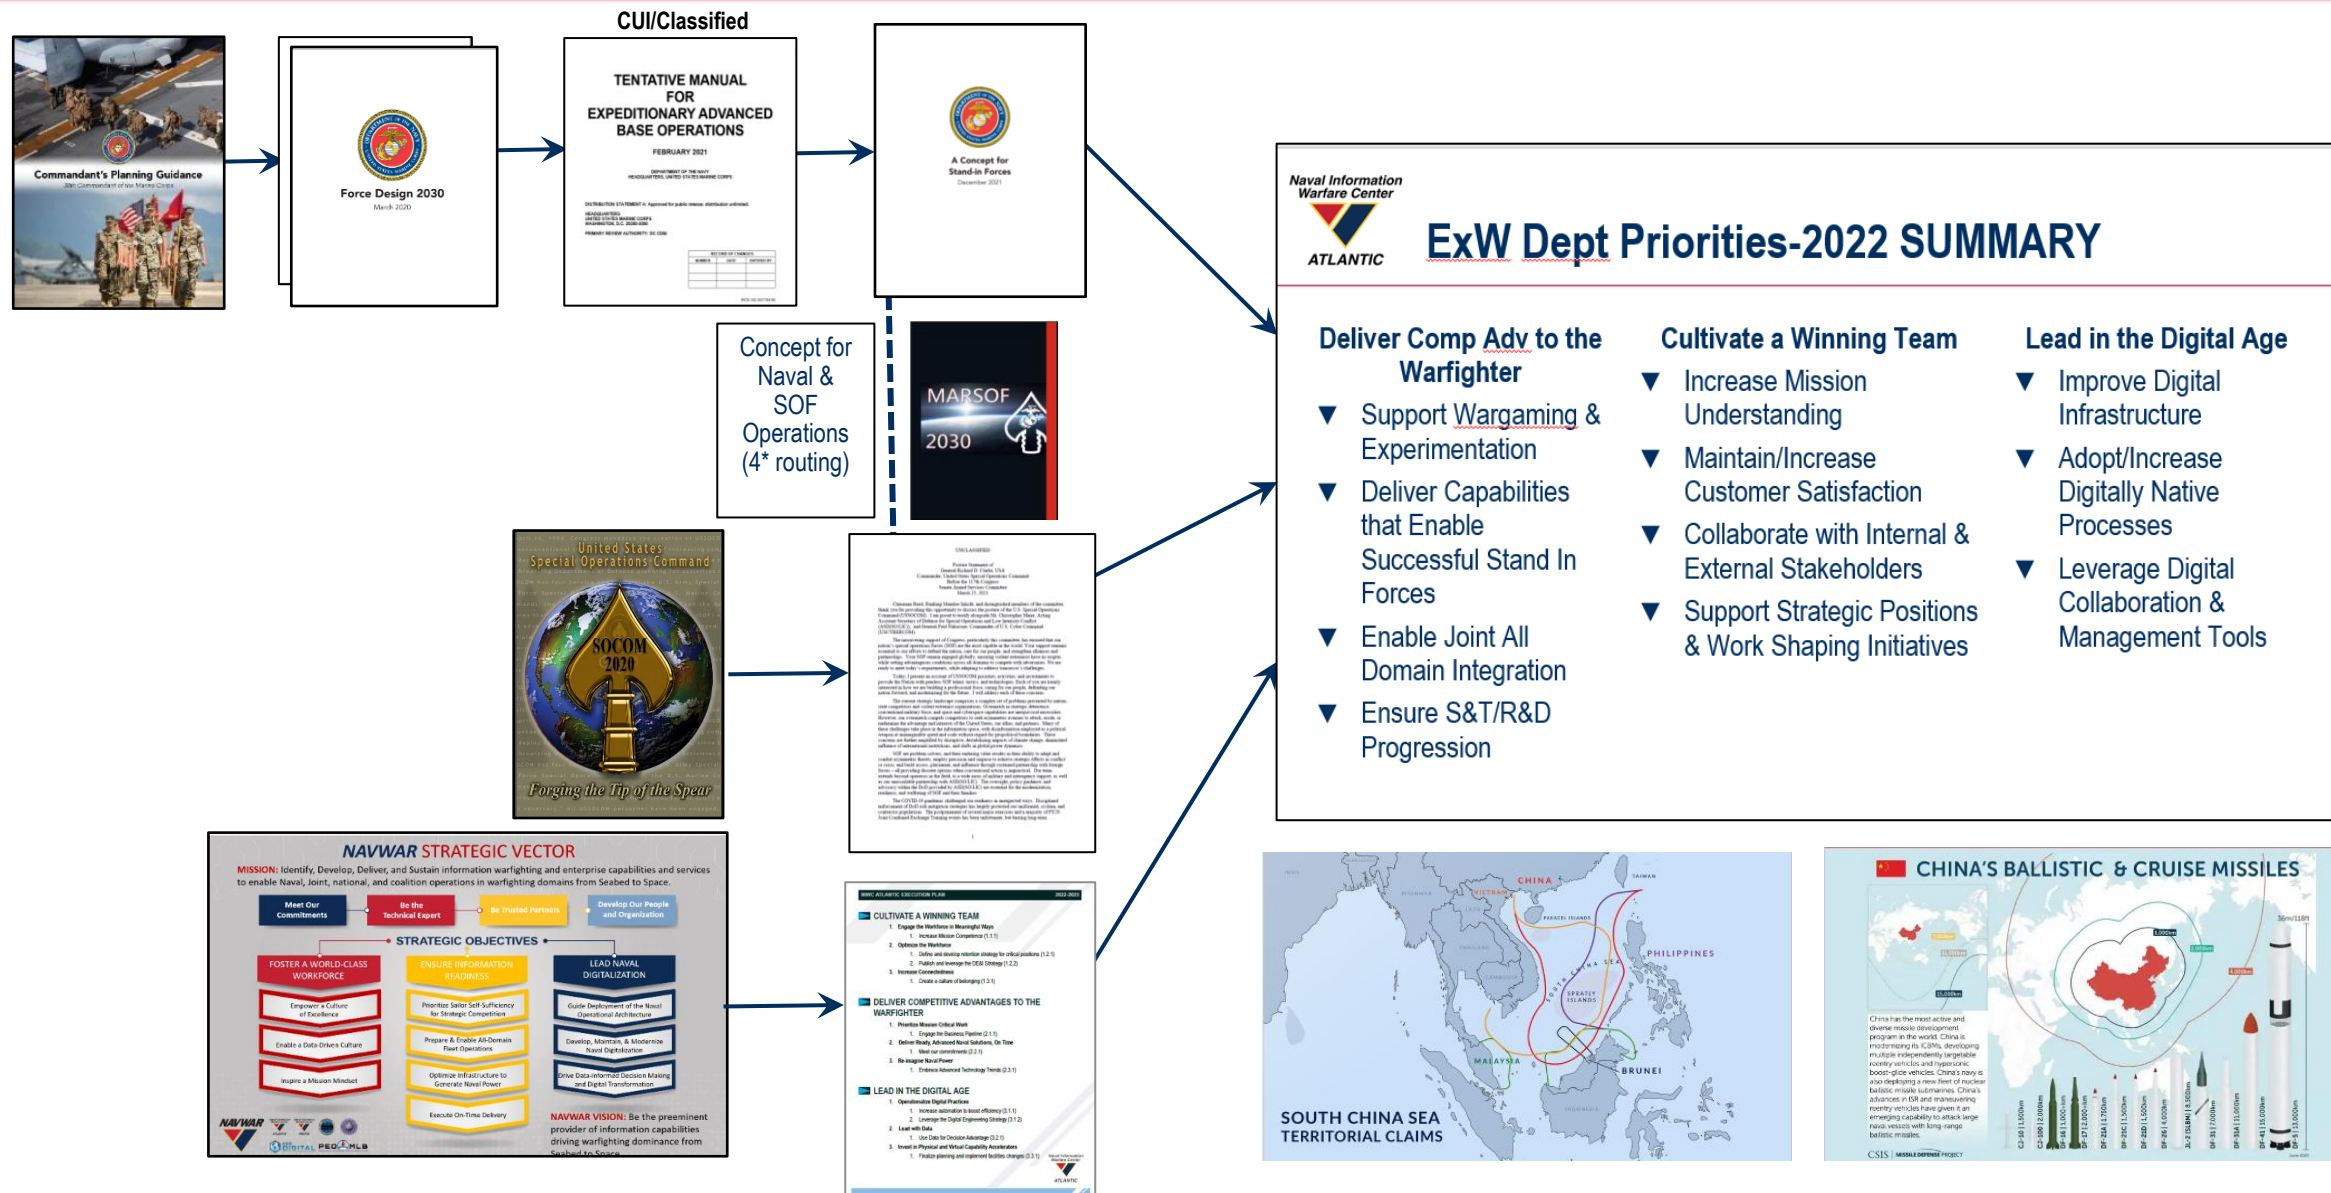

### Lead Naval Digitalization

#### Lead in the Digital Age:

Increase our operational velocity, leveraging digital practices and driving data-informed, human driven decisions.

- I. Operationalize Digital Practices
- II. Lead with Data
- III. Invest in Physical and Virtual Capability Accelerators

# ExW's Strategic Framework Aligns to LANT/MC/SOCOM Guidance

# USMC Opportunities (15 prioritized investments)

- ▼ Expeditionary C5ISRT/counter-C5ISR naval grid that can operate when national connections are lost or degraded.
- ▼ Semi-Autonomous Air-Surface Vessels: sensing, targeting, lethality and connectivity, degraded, austere environment.
- ▼ Short-range (point defense) air defense systems, with an objective of longer ranges.
- ▼ Network Modernization, to include artificial intelligence and cloud technologies.
- ▼ Disruptive capabilities to dominate OIE; countering malign messaging and actions.
- ▼ Resilient communications architectures, to close kill chains in austere environments and JADC2 compatible.
- ▼ Amphibious Combat Vehicle – Mobile C4ISR platforms with EW, sensor fusion, and OPF options for infantry expeditionary forces.
- ▼ Expeditionary logistics systems to sustain Stand-In Force in a contested environment
- ▼ Expeditionary long-range precision fires and infantry battalion organic fires (Organic Precision Fires (OPF)).
- ▼ MAGTF Unmanned Expeditionary Medium Altitude Long Endurance aerial systems and sensors.
- ▼ Modernization of training capabilities to ensure Marines are best prepared for the future operating environment.
- ▼ Long Range Unmanned Surface Vessel with associated swarming drones.
- ▼ Remotely Operated Ground Unit Expeditionary (ROGUE Fires).
- ▼ Reliance on Navy partners: to produce / sustain vital maneuver for the Stand-In Force; amphibious warships, the new Light Amphibious Warship, and robust connectors to enable littoral maneuver and logistical support to a widely disaggregated naval Force.
- ▼ Artificial intelligence-enabled force protection.

# SOCOM Opportunities

## ▼ Special Communications

- Resilient, survivable, federated networks and information ecosystems critical for successful execution of SOF mission

## ▼ Tailorable Lethality

- Significant increases in precision effects and combat lethality to deliver small unit dominance

## ▼ Electronic Warfare

- Offensive EW & Cyber effects that can enable or execute collaborative non-kinetic/kinetic effects., austere environment.

## ▼ Human Performance Optimization

- Novel means to monitor in real time, while safely improving/increasing the SOF operator's physical and cognitive abilities

## ▼ Data Enabled SOF

- Advance in AI/ML and edge computing techniques to enable data accessibility, advanced processing and analysis, and dissemination in contested/disconnected operative environments
- Advance SOF effectiveness through flexible autonomy, reduced operator cognitive loading, and timely actionable insight to tactical decision making.

# Serve our Nation by delivering information warfare solutions that protect national security.

## WIN THE INFORMATION WAR.

Initiative Symposium**  
20 April 2022

**Mr. Toby Straight**  
Expeditionary Intelligence Solutions  
Division Head  
NIWC Atlantic

**Inspire, Collaborate, Support, Execute**

# Understand the Environment and the Importance of our Work

# Expeditionary Intelligence Solutions (EIS) Division Overview

\*Collaborate

## Primary Partners:

- MCSC (PMIS)
- SOF AT&L (PEOs SR, Maritime, SDA, S&T)
- MCWL
- CD&I (OAD)
- NSA
- TECOM
- FMF
- ONR
- MARCENT

## Focus Areas

Information and Data  
Architecture / Enterprise  
Services

Sense, Make Sense, Act

Naval Integration

Signature Management

Fleet Engagement

## What We Do

Provides full spectrum expeditionary intelligence capabilities, technologies and solutions to the warfighter

## Solution Areas

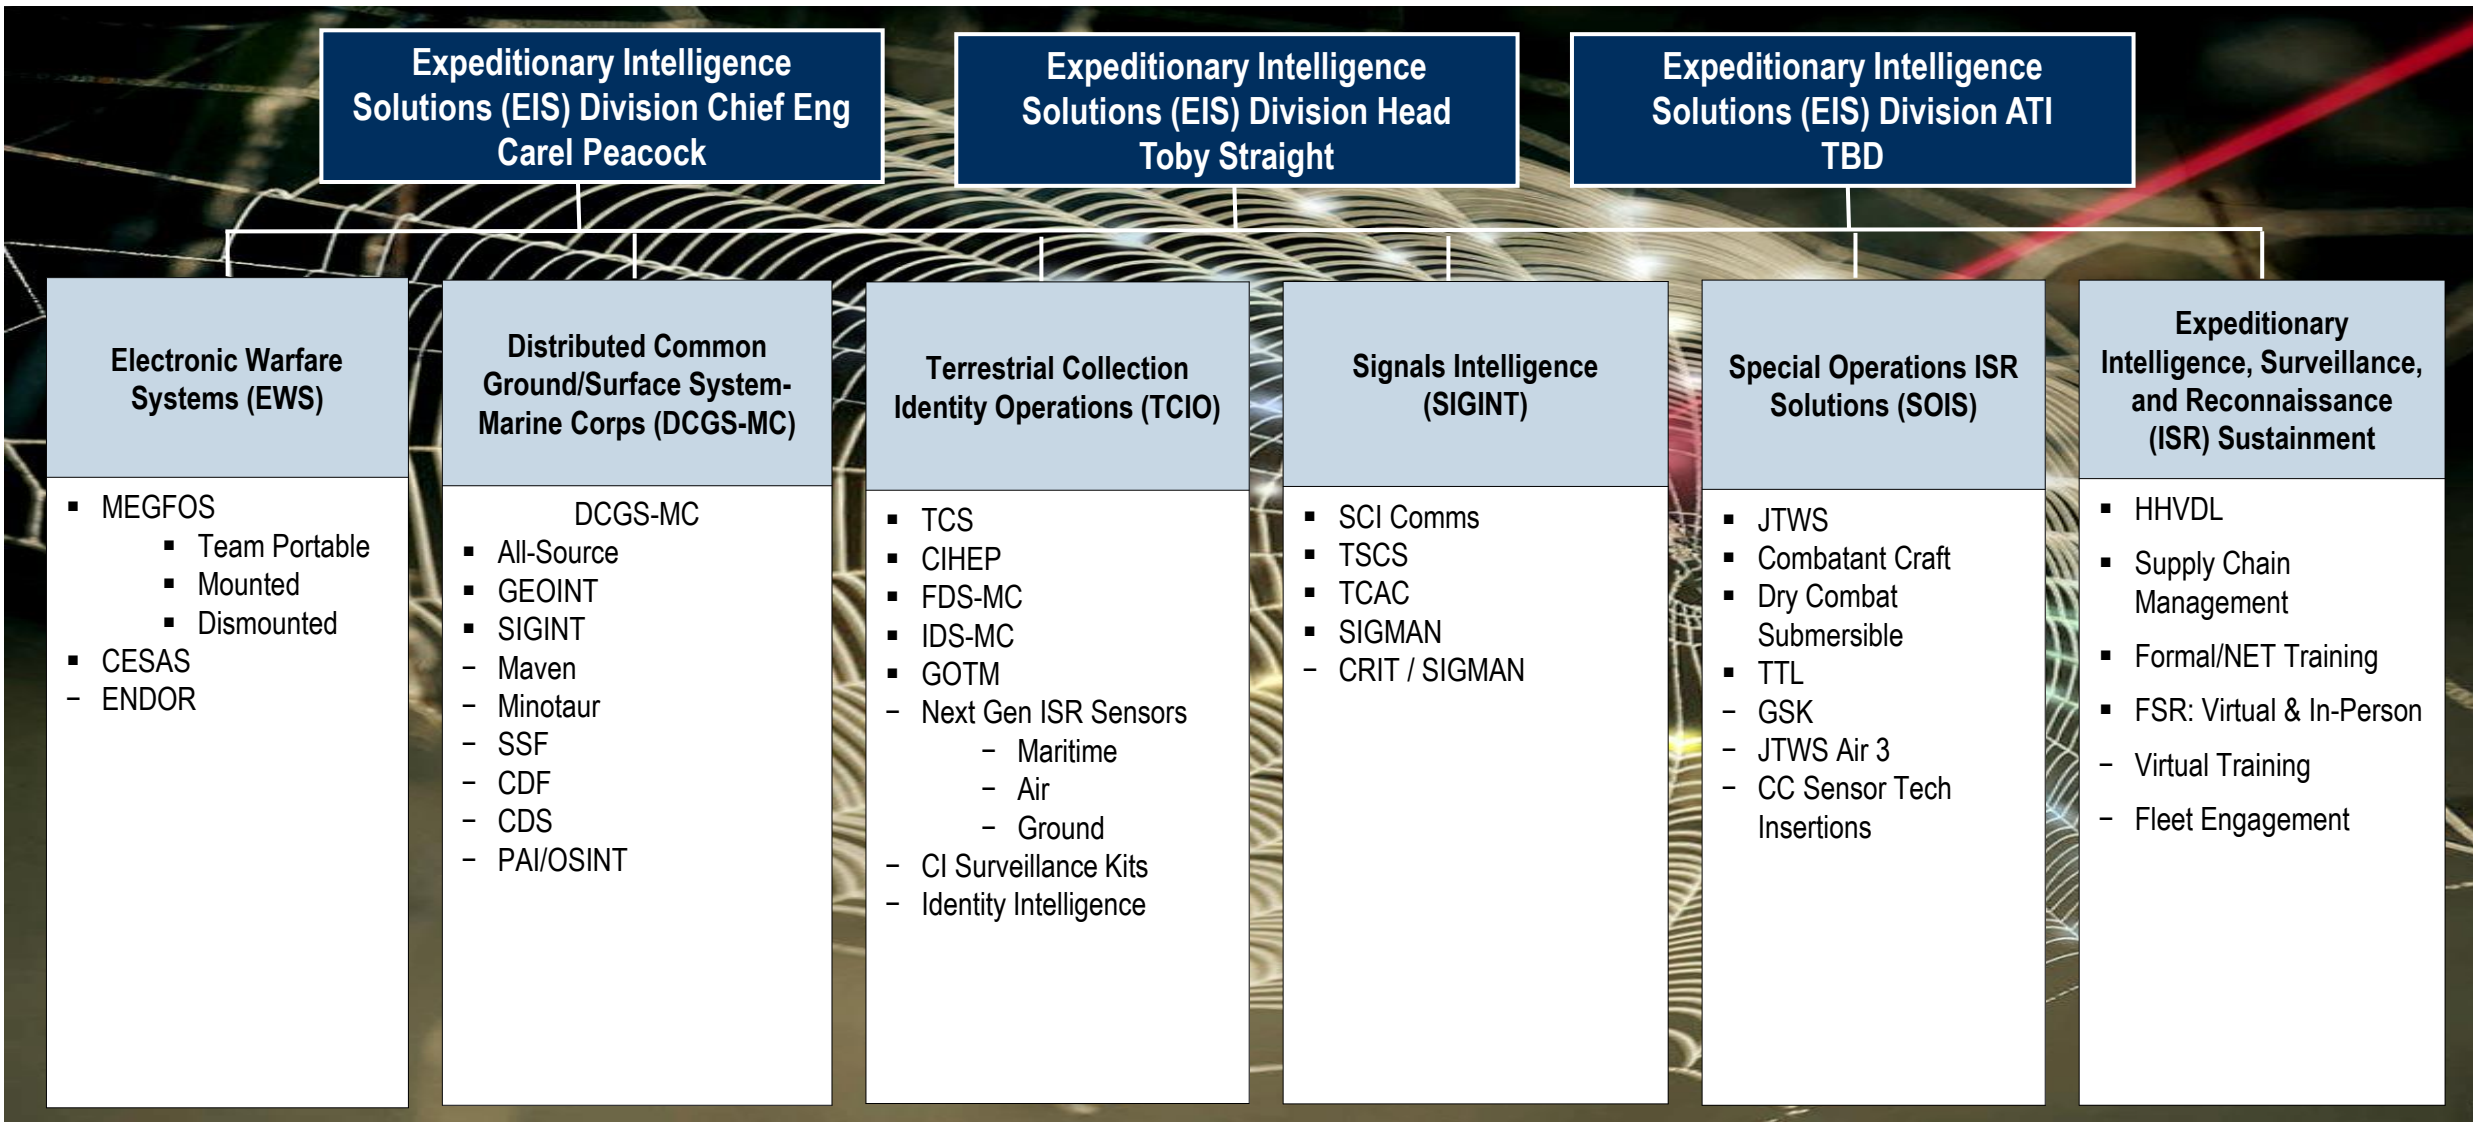

### (Horizontal/Vertical Integration)

- Measurement and Signature Intelligence
- Signals Intelligence
- Electronic Warfare
- Geospatial Intelligence
- Counter Intelligence
- Open Source and Social Media Intelligence
- Identity Operations

MCISRE 2030 must align service intelligence, surveillance and reconnaissance effort to achieve decision advantage for the Fleet Marine Force commanders and intelligence leaders with all domain ISR battlespace awareness, predictive analysis, and assessment necessary for increased lethality and expeditionary force dominance of actively contested littoral spaces.

# EIS Division Organization / IPT Focus Areas

\*Support

# Unite across the Enterprise the Digital and Real World

\*Execute

- \*Hyper Enabled Operator
- \*Sensor to Shooter
- \*Kill Web
- \*Kill Chain

Information is often clouded by the "fog of war," limiting the Marine's ability to make reality-based decisions on which their lives and others' depend. A Marine cannot afford to be mentally or physically fatigued. They do not have the leisure to sort through every bit of information, or the time to judge the value of the information received.

# Naval Information Warfare Center Atlantic

## Expeditionary Enterprise Systems and Services (E2S2) Division Overview

Charleston Defense Industry Association  
60th Small Business and Industry  
Outreach Initiative Symposium  
20 April 2022

**Mr. Jason Brooks**  
Enterprise Network Infrastructure  
Tech Lead  
NIWC Atlantic

# Expeditionary Enterprise Systems and Services (E2S2) Division Overview

## Primary Partners:

- PEO Digital Enterprise Services
  - PFM Marine Corps Supporting Establishment Services
- PEO Manpower, Logistics, and Business (MLB)
  - PMW 230
- MARCORSYSCOM
- Headquarters Marine Corps
  - DC Information (DC I)
- MARFORCYBER
  - Marine Corps Cyberspace Operations Group (MCCOG)
- ASN (RDA)

## IPTs

Wireless Enterprise Systems & Services

Enterprise Communication Infrastructure

Enterprise Engineering & Integration Services

Enterprise Network Infrastructure

## What We Do

- We conceive, develop, implement, operate, and modernize **enterprise network services** and **infrastructure** for the Department of the Navy, through the United States Marine Corps.

## Major Systems / Solutions

- **Enterprise network services**
  - Marine Corps Business Operations Support Services (MCBOSS; Marine Corps DevSecOps Platform Services)
  - Hybrid Cloud Services (HCS)
  - Enterprise Staging & Delivery (ES&D)
  - Direct support for sponsors (PMW-230, DC I, MCCOG, etc.)
- **Enterprise network infrastructure**
  - Enterprise Infrastructure Modernization (EIM)
  - SONIC VDI (zero-client solution for MCEN-S)
  - Public Safety Systems (PSS)
  - Marine Corps Mobility & Wireless infrastructure (including 5G)

Powering the kill chain transformation

# Organizational Structure

Expeditionary Enterprise Systems & Services Division Head  
**Don Yeske**

E2S2 Chief Engineer

Left-Side Support for mission partners:

- DC I (IC4)
- PEO MLB
- PEO Digital

## Wireless Enterprise Systems & Services (WES2) IPT

### Projects

- DoD/DON-level 5G experimentation
- USMC-specific DoD 5G experimentation
- USMC-unique wireless material solutions

## Enterprise Communication Infrastructure (ECI) IPT

### Projects

- USMC and Army Public Safety Systems / Emergency management capabilities & services
- USMC Unified Capabilities (UC) voice systems / Enhanced transport capacity / Convergence of voice, video, and data
- Receive, inventory, integrate and Implement cybersecurity and best practices for USMC IT assets

## Enterprise Network Infrastructure (ENI) IPT

### Projects

- DON and USMC network infrastructure modernization
- USMC-unique enterprise network material solutions

## Enterprise Engineering & Integration Services (E2IS) IPT

### Projects

- DON and USMC DevSecOps Platform Services
- Cross-service rapid prototyping and integration

# E2S2 Industry Support – existing & planned

# E2S2 Industry Support – emerging themes

## ▼ Technical management support services

- SAFe coaching/mentoring support for various sponsors
- Management of value streams and Agile Release Trains

## ▼ Development support services

- “Cloud Sherpa” role (determining, finding, and directing mission owners to the right service providers to suit their needs)
- PSS expertise for architecture, model, prototype, testing, and shareholder coordination. ( Next Generation 911, FirstNet...)
- Onboarding support (helping new development teams get into and begin using software factories)

## ▼ Development services

- Rapidly scalable development teams capable of coming up to speed and working quickly in government-specified software factories
- Specific expertise using government-owned/operated software factories (MCBOSS, Overmatch Software Armory, Platform One/Black Pearl, ...)

# Serve our Nation by delivering information warfare solutions that protect national security.

## WIN THE INFORMATION WAR.

Charleston Defense Industry Association  
**60<sup>th</sup> Small Business and Industry Outreach  
Initiative Symposium**  
20 April 2022

**Mr. Jeremy Richardson**  
NIWC Atlantic  
Land Systems Integration Division Head  
(Acting)

# Land Systems Integration Division

## Overview

### Primary Partners:

- PEO Land Systems
  - PM Advanced Amphibious Assault
  - PM Light Armored Vehicles
  - PM Ground Based Air Defense
- MARCORSYSCOM
  - PFM CES - PM C2S – NOTM
  - PFM CES – PM CS – EXCOMM
  - PFM GCES – PM Fires
  - PFM LCES – PM Light Tactical Vehicle
  - PFM LCES – PM Medium Heavy Tactical Vehicles
- USN - Naval Expeditionary PO
- USA
  - PM Light Tactical Vehicle
  - PM Medium Mine Protected Vehicles
- USAF - AFCENT/MRAP PO/JLTV PO

#### IPTs

Vehicular Technology Transition  
Counter Threat Platforms  
Advanced Reconnaissance  
Modern Vehicle Fielding  
Fielded Ground Vehicles

### What We Do:

Provide **design, engineering and full scale integration** of C4ISR capabilities into tactical ground vehicle platforms. **Improve** efficiency and effectiveness of **integrating mission equipment on vehicle platforms** for **specific mission activities**. Provide **post-fielding sustainment support**.

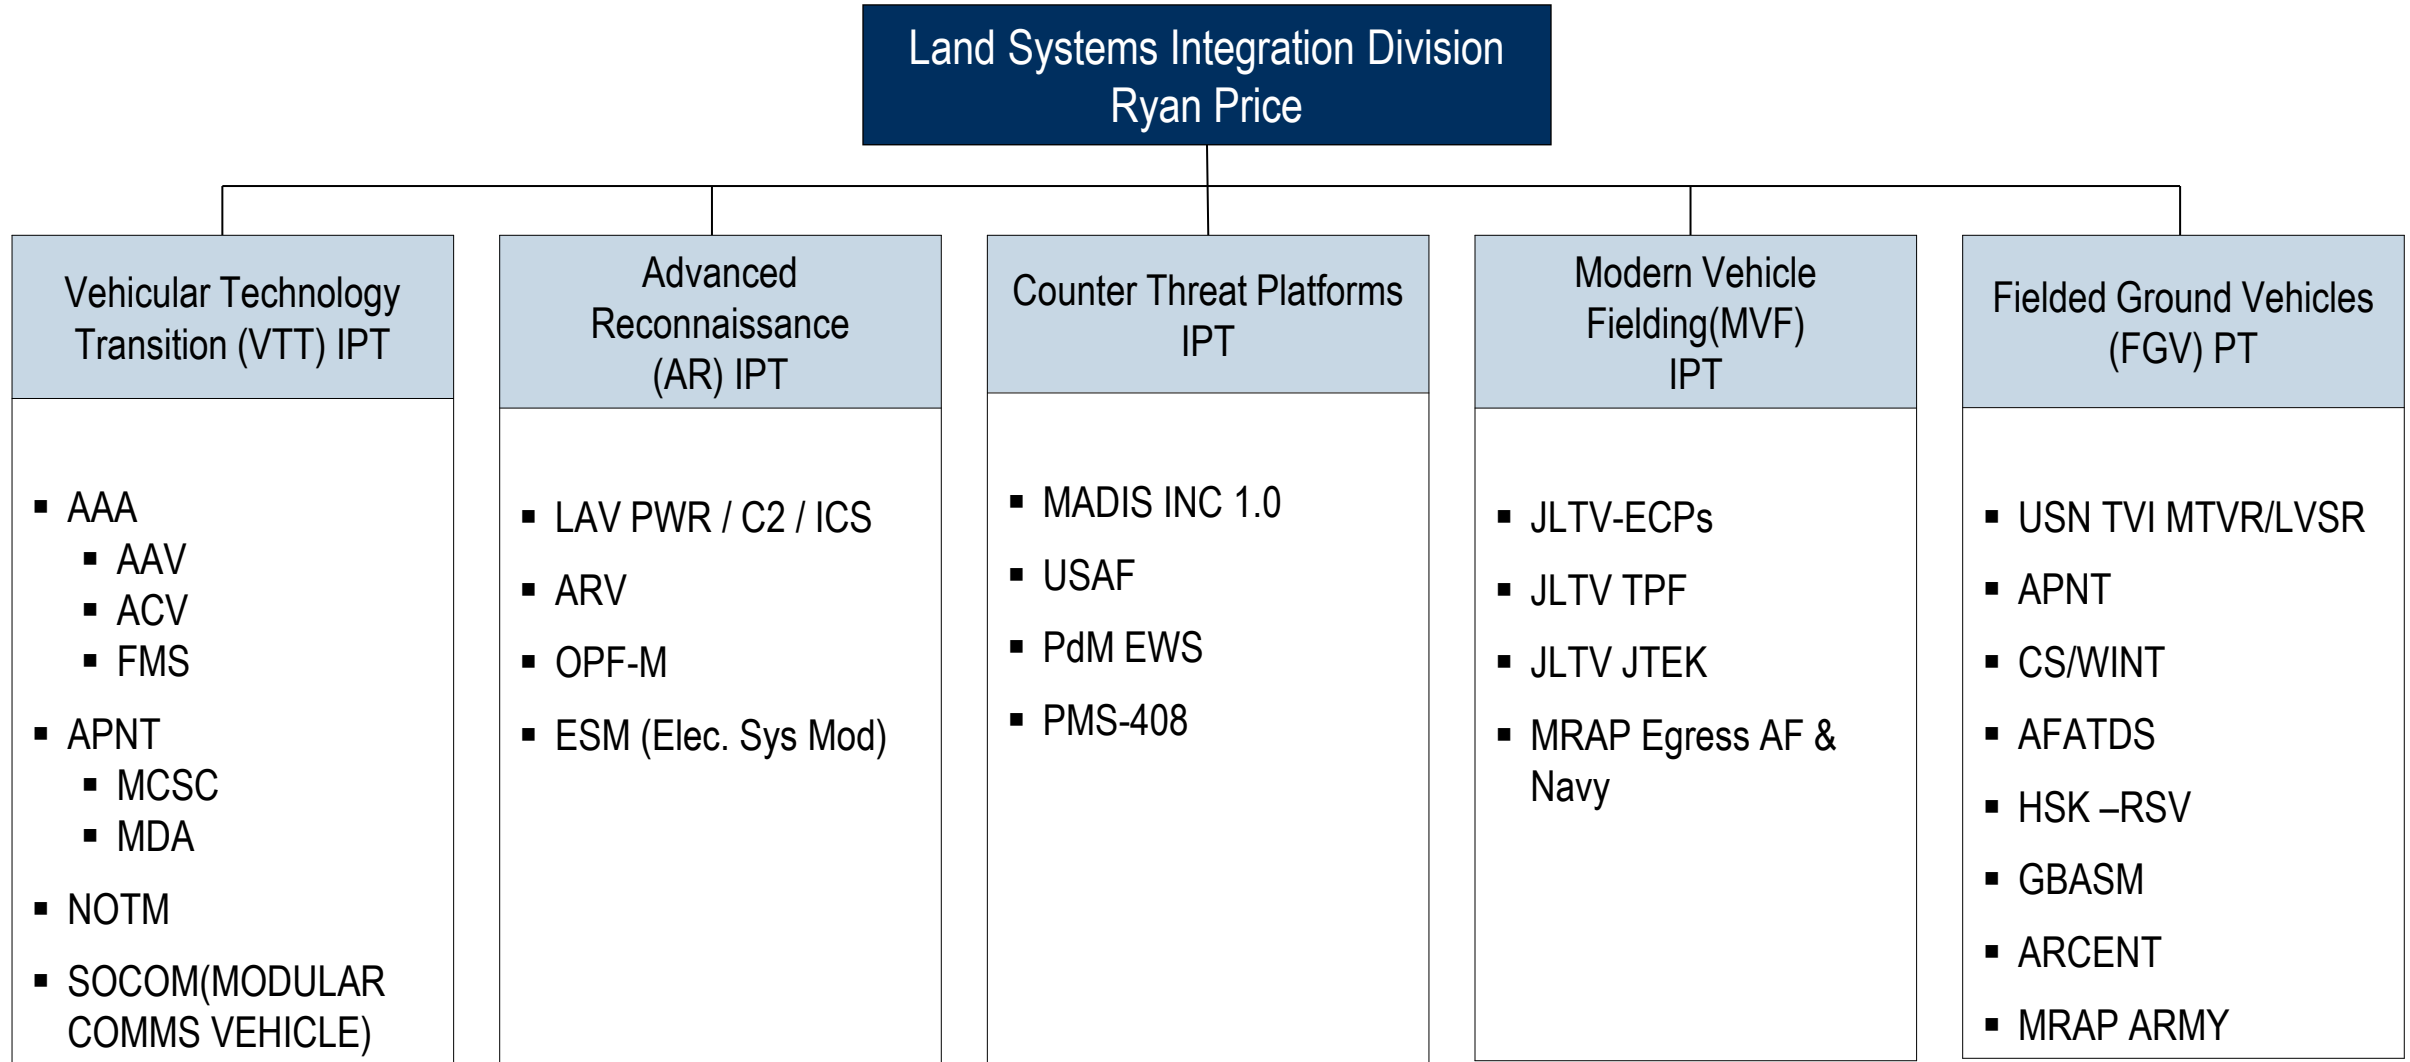

### Major Systems / Solutions

- C4ISR system integration (USMC, USN, USA, USAF)
- Platforms:
  - MRAP, JLTV, MTRV, LVSR
  - AAV, ACV, LAV, ARV....
- Networking on the Move (NOTM)
- Digital Integration Facility (DIF)
- APNT
- Marine AD Integrated System (MADIS)

# Land Systems Integration Division

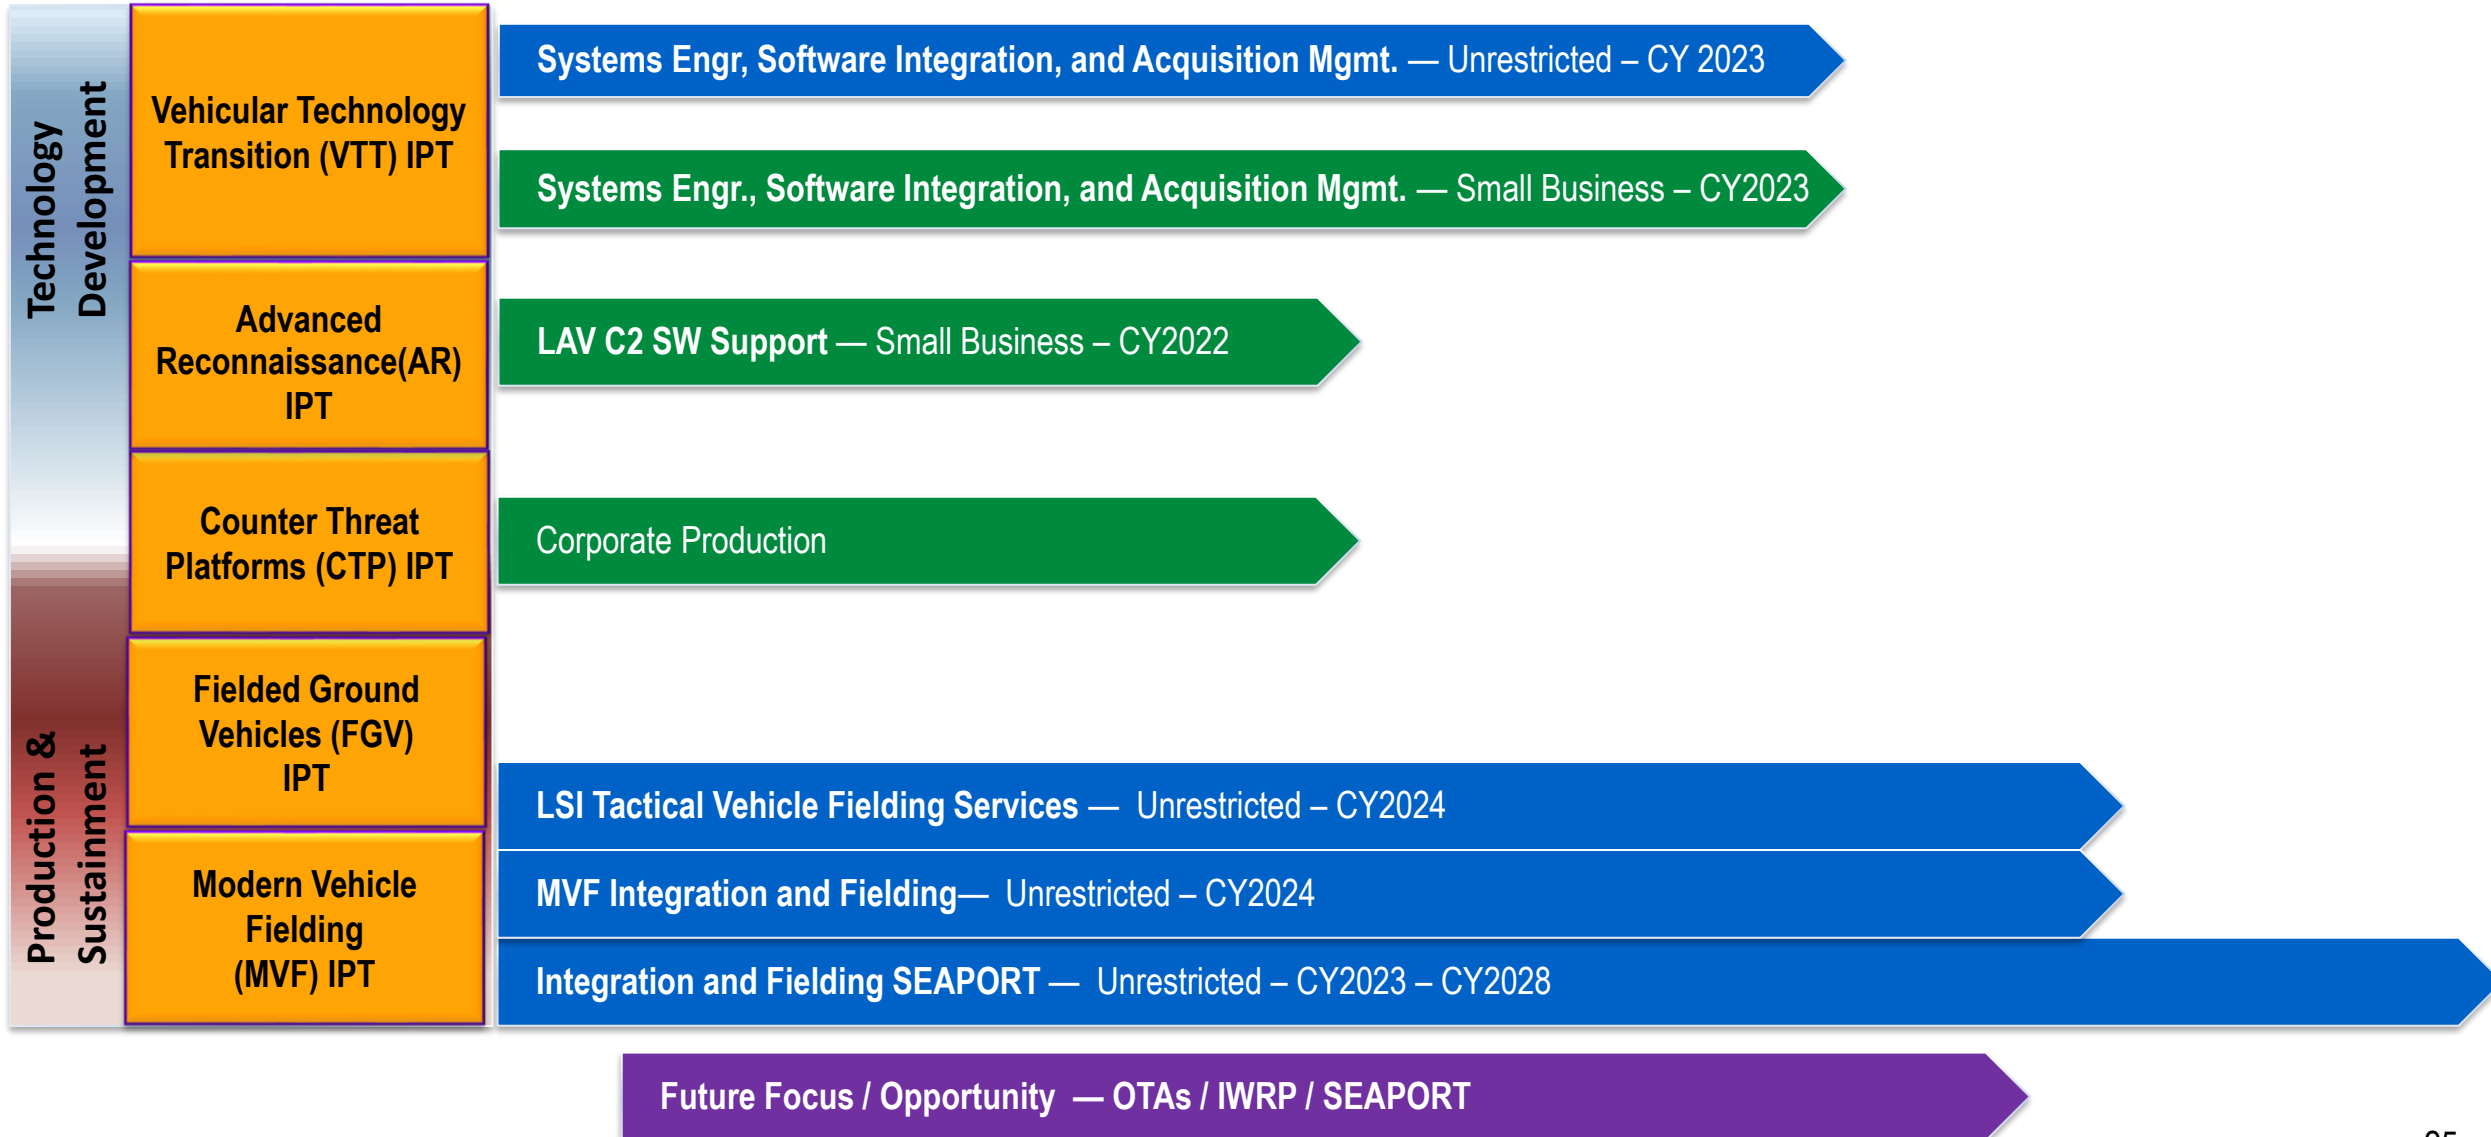

## Integrated Product Team (IPT) Organization

# Land Systems Integration Division

## Integrated Product Team (IPT) Contracts

# Land Systems Integration Division

The Premier DOD organization for design, integration and fielding of C4ISR into Expeditionary Platforms

## Pursue ways to automate our engineering work

- Digital Engineering to speed engineering decisions - M&S
- Mixed Reality – Supplement Engineering, Operations, and Sustainment.
- Modularity - Enable capability re-use across platforms as operations require.

**Leverage economies of scale and scope across most DOD vehicle fielding efforts (Naval, USMC, Army, Air Force, and SOCOM) to provide the highest value available in the DOD**

**Partnering, aligning with other organizations in ways that accentuate the best each can provide**

# Technologies to Enhance Land System Modernization

**Modeling and  
Simulation**

**Model Based Systems  
Engineering**

**Human Factors /  
HSI**

**Approaches to  
Standardize Interfaces  
for Modularity**

**Mixed Reality**

## Bottom Line

**We are looking for technologies and techniques to rapidly deliver high quality C4ISR integrated Land Systems that meet/exceed the needs of the Warfighter.**

# Naval Information Warfare Center Atlantic

## Expeditionary Command, Control and Communications Solutions (EC3) Division

Charleston Defense Industry Association  
**Small Business and Industry Outreach  
Initiative Symposium**

20 April 2022

**Mr. Tim Turner**  
NIWC Atlantic  
EC3S Division Head

# Expeditionary C3 Solutions (EC3S) Division Overview

## Primary Partners:

- MARCORSYSCOM
  - Portfolio Mgr. Command Element Systems (PfM CES)
- US Navy
  - Naval Expeditionary Program Office
- US SOCOM
  - SOF ATL
  - PEO C4 (SOF)
- MCWL
  - S&T Div
  - Ex Div
- PEO Land Systems
  - PM G/ATOR / PM FRS
- ONR

### IPTs

Tactical Services and Infrastructure (TSI)  
 Command and Control Situational Awareness (C2SA)  
 MAGTF C2 Services and Applications (MC2SA)  
 USMC Communications Systems (UCS)  
 Special Operations Communications Systems (SOCS)

## What We Do

- Develop, integrate and equip Expeditionary Forces with mobile C3 facilities, devices and services that provide fused situational awareness, facilitate information sharing and enhances the decision support process.

## Major Systems / Solutions

- Common Hosting Environment (CHE)
- Combat Data Network (CDN)
- Operational Command Post (OCP)
- Joint Battle Command Platform FoS
- Tactical Communications Systems
- Tactical Service Oriented Architecture (TSOA)
- Global Command Control System (GCCS) Tactical Combat Operations (TCO)
- Marine Corps Common Handheld (MCH)
- USMC/Navy Tactical Mobility and Wireless Solutions
- Joint Tactical Common Operational Picture Workstation (JTCW)
- SOFTACS Deployable Network and SCAMPI

Provide and Sustain Tactical Command, Control and Communications capabilities to Expeditionary Forces

# EC3S Division Organization

**Tim Turner**  
Division Head

## **MAGTF Command & Control Situational Awareness (MC2SA)**

- Joint Information Environment
- Software/Apps Development and Integration
- Training Dev.
- C2 Data Analytics

## **Tactical Services & Infrastructure (TSI)**

- Tactical Network Communications Infrastructure & Services
- Tactical System Applications & Services

## **Command & Control Situational Awareness (C2SA)**

- Navy/Marine Corps Wireless & Mobility Solutions
- BFT Situational Awareness
- Embedded Systems

## **USMC Communications Systems (UCS)**

- Tactical Communications Systems

## **Special Ops Comms Systems (SOCS)**

- SOCOM Comms Systems
- SOCOM Network Sustainment
- SOCOM Kitting and Installations

# EC3S Division Thrust & Tech Focus Areas

Advancing technologies to build new capabilities relevant to Warfighter needs and operations

## Technology Focus Areas

1. Artificial Intelligence
2. Assured Communications
3. Cloud Computing
4. Cybersecurity
5. DevSecOps
6. Mobility
7. Model-Based Systems Engineering
8. On-Demand Manufacturing

- ▼ Joint/Naval/MAGTF C2: Enable the transition of C2 capabilities from systems and applications to platform agnostic services. NIWC Atlantic is the lead software developer/integrator of the TSOA environment, mobile apps and services. NIWC Atlantic is participating in advancing JADC2.
- ▼ Tactical Network Modernization: Ongoing convergence of next gen COC, CHE, and CDN system architectures. Strong engagement with the Program Office to participate in the design and supporting a common architecture for both CDN and CHE. NIWC Atlantic is participating in tactical network architecture design and development ISO naval integration. Strong engagement with Program Office in design and support of war gaming.
- ▼ BFT/Mobility: Enable the transition of BFT Enhancements, BFT Naval Integration, Naval Mobile Devices, USMC End User Devices, and Mobile Kits. NIWC Atlantic is strongly engaged with Naval BFT integration and warfighter mobile environments.
- ▼ Tactical Comms Systems: Provide LPI/LPD and resilient communications in a tactical environment. NIWC is the leading integrator of modernized tactical communications systems for the USMC. NIWC is involved in Non-RF Transport, Free Space Optics (FSO), LiFi Technology, LPI/LPD, SATCOM enhancements, Comms resilience, Alternate Waveforms, and device SWaP reductions.
- ▼ SOCOM Technology: NIWC Atlantic is strongly engaged with the Program Office in the design and support of SOCOM Communications Enhancements, SOCOM Network Enhancements, and PEO C4 S&T systems.

# Challenges & Future Opportunities

- ▼ Joint / Naval C2 System Interoperability in support of EABO and Stand-in Force
- ▼ Artificial Intelligence / C2 Data Analytics
- ▼ Alternative configurations for distributed C2
  - Focus on distributed operations / C2 / Any Sensor Any Shooter
  - C2 must be resilient and redundant
  - Reduce electronic and thermal signatures
  - Transportability
- ▼ DevSecOps & MBSE supporting getting better capabilities to the tactical edge faster
  - Cross Domain Solutions
  - End Point SW Development
  - Map Rendering Technology
- ▼ Protected LPI/LPD SATCOM and new waveforms
  - Maritime and Ground Mobile SATCOM on the move
  - Non SATCOM BLOS High Bandwidth Communications
- ▼ Exercise Lessons Learned
  - Advanced Naval Technology Exercise (ANTX)
  - Naval Operational Exercises
  - Wargames / Simulations/ Live Virtual Constructive (LVC)

# Questions ?

# Naval Information Warfare Center Atlantic

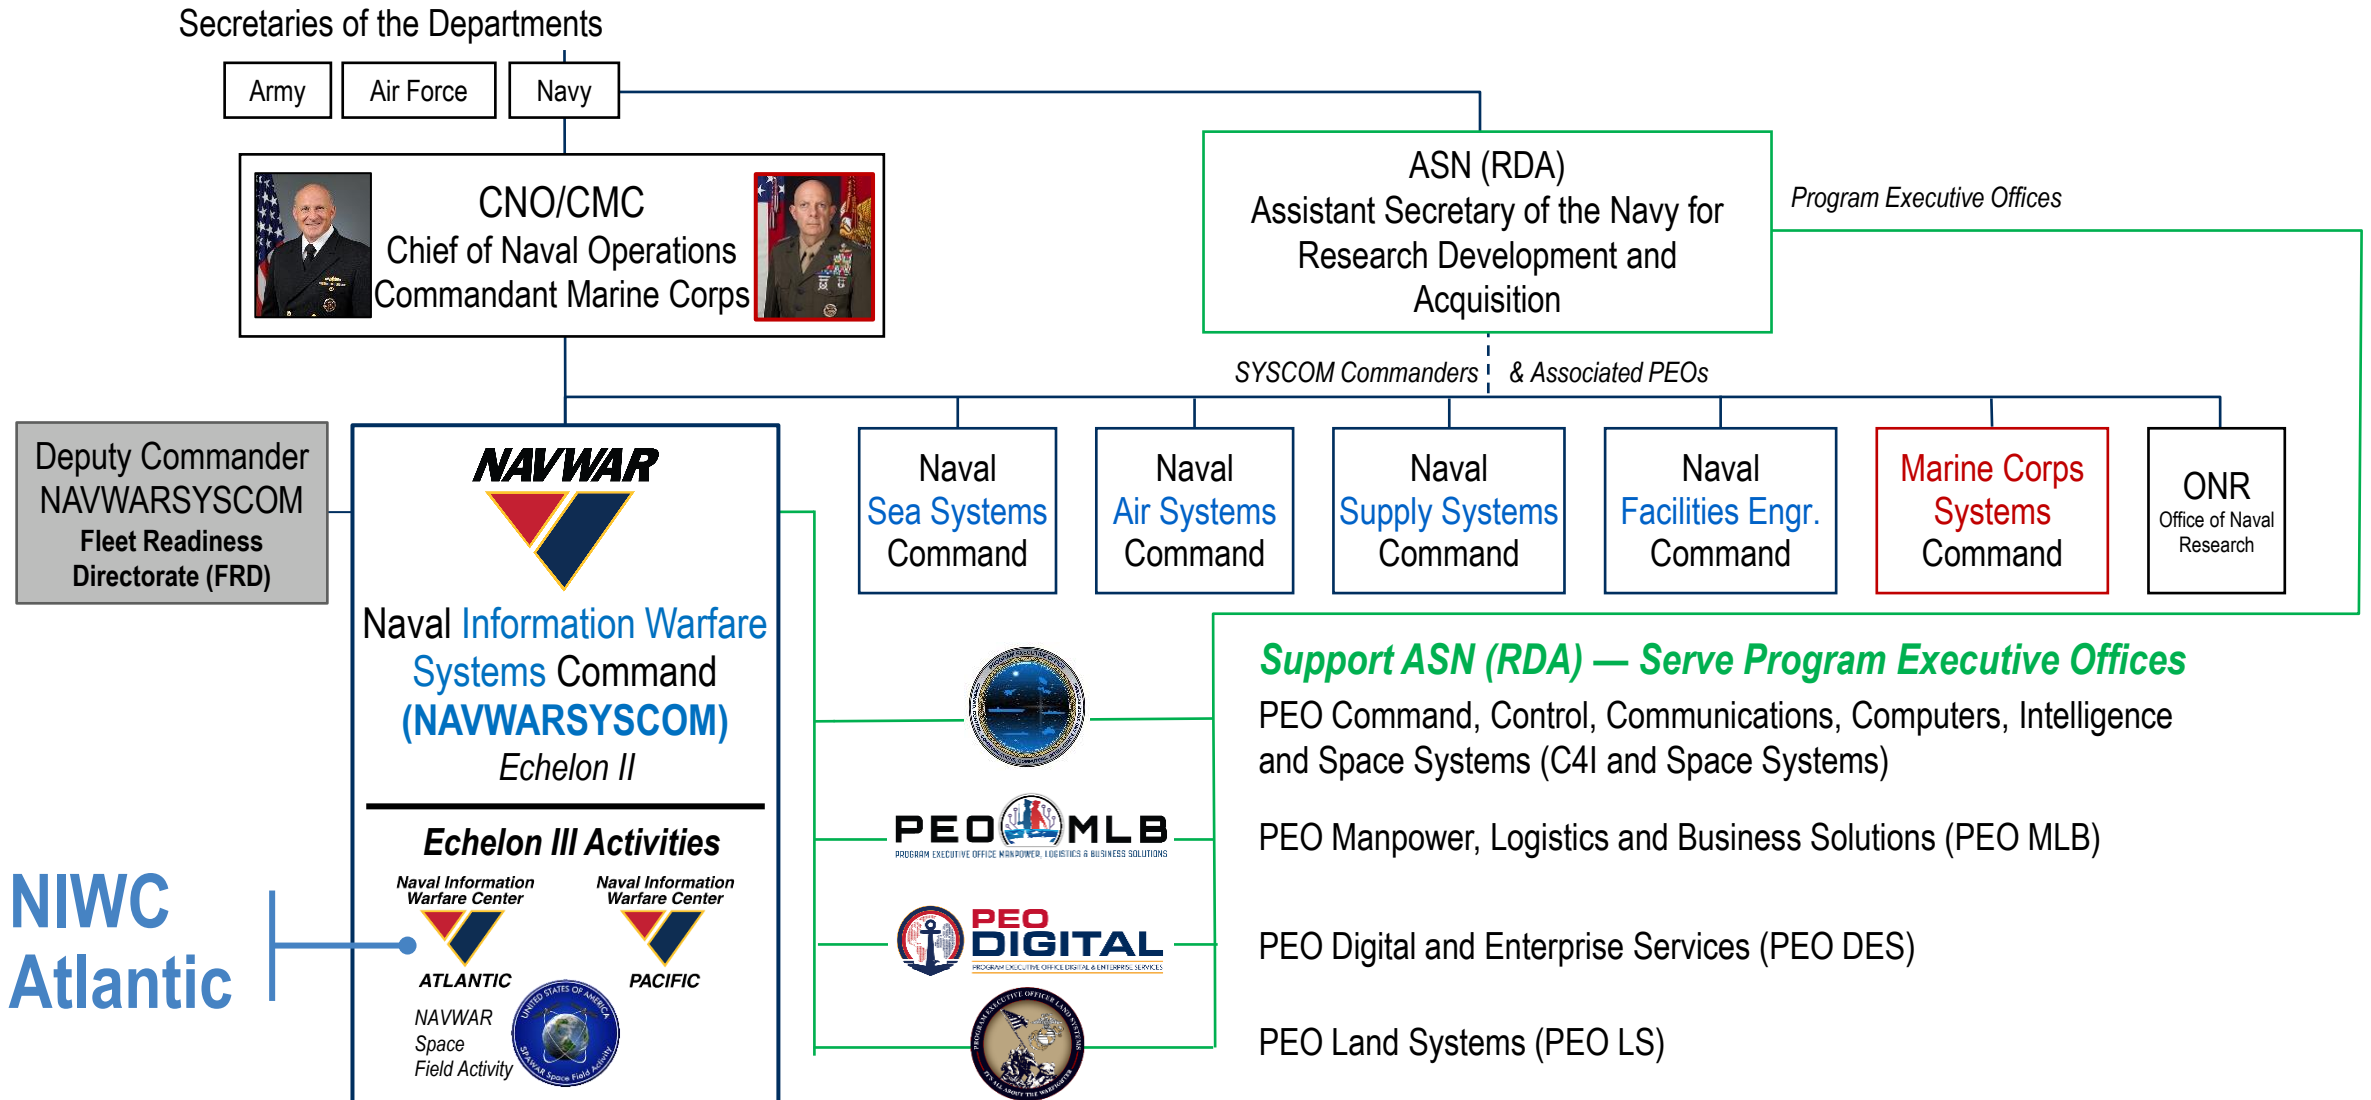

Charleston Defense Industry Association  
**60<sup>th</sup> Small Business and Industry  
Outreach Initiative Symposium**

20 April 2022

**Mr. Peter C. Reddy, SES**  
Executive Director  
NIWC Atlantic

# Where We Fit in the DON Structure

**We address the Warfighter's top technology challenges through research, development, delivery and sustainment of the very best IW solutions.**

# Strategic Environment

- ▼ Russia's invasion of Ukraine
- ▼ Strategic competition with China and Russia ("pacing", "acute")
- ▼ Competitors using all dimensions of power
- ▼ U.S. military advantages eroding
- ▼ Battlespaces persistently surveilled
- ▼ Convergence of new technologies
- ▼ COVID-19 global disruption
- ▼ Terrorism remains a persistent condition

"... we have an ongoing responsibility to provide and maintain a naval force that is always ready to defend our shores, maintain sea control, and protect our national security and economic interests. "

*SECNAV-Del Toro*

# **Mission:** Serving our Nation by delivering information warfare solutions that protect national security.

IW is one of our Nation's highest defense priorities — as leaders in this warfighting domain, our role in our Nation's defense has never been more critical to future fights.

## **Vision:** Win the Information War

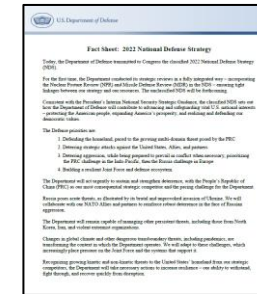

Information warfare solutions includes: C2 systems, communication systems (radios), networking systems (routers/switches), cyber operations (red team/ forensics/network defense), intelligence, surveillance, reconnaissance (sensors/decision support applications), business systems (benefits/personnel) and information security.

# Influencers — Key Guidance

- ▼ National Defense Strategy 2022
- ▼ Tri-Service Maritime Strategy

- ▼ INCOSE Systems Engineering Vision 2035

# Fact sheet: 2022 National Defense Strategy

- NDS, the capstone for how DoD will advance and safeguard vital U.S. national interests –
- Protecting the American people
  - Expanding America's prosperity
  - Realizing and defending America's democratic values

 U.S. Department of Defense

Fact Sheet: 2022 National Defense Strategy

Mutually-beneficial Alliances and partnerships are an enduring strength for the United States, and are critical to achieving our objectives, as the unified response to Russia's further invasion of Ukraine has demonstrated. Answering this "call to action," the Department will incorporate ally and partner

**NDS Fact Sheet ([defense.gov](https://www.defense.gov))**  
2022 NDS is consistent with the President's Interim National Security Strategic Guidance, released in March 2021.

**Defense priorities for military planning and activities:**

1. Defending the homeland, paced to the growing multi-domain threat posed by the PRC
2. Deterring strategic attacks against the United States, Allies, and partners
3. Deterring aggression, while being prepared to prevail in conflict when necessary, prioritizing the PRC challenge in the Indo-Pacific, then the Russia challenge in Europe
4. Building a resilient Joint Force and defense ecosystem.

**Primary ways to advance Goals:**

- **Integrated deterrence** entails developing and combining our strengths to maximum effect, by working seamlessly across warfighting domains, theaters, the spectrum of conflict, other instruments of U.S. national power, and our unmatched network of Alliances and partnerships. Integrated deterrence is enabled by combat-credible forces, backstopped by a safe, secure, and effective nuclear deterrent.
- **Campaigning** will strengthen deterrence and enable us to gain advantages against the full range of competitors' coercive actions. The United States will operate forces, synchronize broader Department efforts, and align Department activities with other instruments of national power, to undermine acute forms of competitor coercion, complicate competitors' military preparations, and develop our own warfighting capabilities together with Allies and partners.
- **Building enduring advantages** for the future Joint Force involves undertaking reforms to accelerate force development, getting the technology we need more quickly, and making investments in the extraordinary people of the Department, who remain our most valuable resource.

# NIWC Atlantic's Strategic Framework

## Aligns to Higher Strategic Guidance & NAVWAR Strategic Vector

### NAVWAR Strategic Objectives: Foster a World-class Workforce

#### Cultivate a Winning Team:

Cultivate a winning workforce rooted in our core values, with a deep understanding and connection of the warfighter and each other.

- I. Engage the Workforce in Meaningful Ways
- II. Optimize the Workforce
- III. Increase Connectedness

### Ensure Information Readiness

#### Deliver Competitive Advantages to the Warfighter:

Maintain and deliver the most critical information warfare solutions that the warfighter needs to win today, while developing capabilities for the future force.

- I. Prioritize Mission Critical Work
- II. Deliver Ready, Advanced Naval Solutions, On Time
- III. Reimagine Naval Power

### Lead Naval Digitalization

#### Lead in the Digital Age:

Increase our operational velocity, leveraging digital practices and driving data-informed, human driven decisions.

- I. Operationalize Digital Practices
- II. Lead with Data
- III. Invest in Physical and Virtual Capability Accelerators

Delivering information warfare capabilities to the naval, joint and national warfighter.

## 8 Technology Focus Areas to Achieve Technology Goals

Technology Strategy and TFA analysis drives work acceptance and lab/facility infrastructure allocations and tools.

**Artificial Intelligence:** Provide warfighters with analytics-driven, data-informed, and technology-empowered capabilities to drive decision advantages and optimal mission outcomes.

**Assured Communications:** Addresses the demand for resilient, and sometimes covert, wired and wireless communications in degraded and/or denied environments.

**Cloud Computing:** IT modernization and digital transformation for resilient infrastructure, platform and software services.

**Cybersecurity:** Provides protection from unauthorized use of and/or defends electronic data, hardware, software from disruption or of the services they provide.

**DevSecOps:** Refers to replacing siloed Development, Security and Operations to create multidisciplinary teams that collaborate with shared and efficient practices and tools.

**Mobility:** Provide Wireless Technology and enterprise access for the warfighter to engage with a mobile environment and applications, anytime, anyplace.

**Model-Based Systems Engineering (MBSE):** Technologies used to support the development, management and application of virtual constructs of varying fidelity across the spectrum of systems engineering.

**On-Demand Manufacturing:** Produce products and/or components, when or as they are required at the point of use, using additive and/or traditional manufacturing methods.

# Department and Sponsor Alignment

# Naval Information Warfare Centers NWCF

## Activities operate on a Customer / Provider basis

### ▼ Navy Working Capital Fund

- Revolving Fund – Pays bills and is reimbursed by customers
- Accepting funds from various sources
- Receive no appropriated funding directly
- Operate like non-profit business with “customer – provider” relationship

### ▼ Mission Funded

- Receive fund allocations from the Congressional budget to accomplish their mission and pay their expenses
- Organizations funded through appropriations (hence “Mission funded”)

### Benefits of NWCF

- NWCF Provides the agility to wane or surge as required for ongoing and emergent needs
- Complimentary skill sets employed to enable, extend and enhance IW solutions
- Continuously pursue high risk tech solutions enabling Naval IW superiority
- Full cost visibility
- Accountability/flexibility
- Cost Sharing
- Emphasis on cost product quality
- Cost stabilization
- Processes promote business acumen
- Customer influence

# Naval Integration Laboratories and Facilities

## Driving integration and interoperability into Naval Capabilities

### C4I Shipboard Integration Facility

Employs system-of-systems cost effective engineering, acquisition rigor, and integration for the development, delivery, and sustainment of integrated, interoperable, and effective C4ISR, business IT, and space systems to the Navy new construction and Military Sea Lift Command platforms.

### Common Submarine Radio Room

The Navy's only automated radio room that is scalable and delivers common architecture, logistics and training across all five classes of submarines. Produced and tested within an exact replica of the submarine's radio room, dramatically reducing installation time. This reduced install time was paramount to increasing SSBN operational availability.

### Expeditionary Systems Integration and Innovation Center (ESIIC) Bay

Supports faster technology transition to the warfighter. Serves the Navy and Marine Corps as it transitions into an interactive, collaborative, flexible and modernized digital laboratory. Laydown areas for prototyping and design development

# Cyber and Electronic Warfare and Operations to protect and defend our integrated networks

**Strengthening and securing naval systems and networks** — More robust, more resilient, more tough

**Securing naval systems** — More responsive, more resistant to attack — More intuitive — Removing “chance,” increase speed to discovery — Increase trust

- Support to DIA and DISA for the JWICS network
- SCI and CAP Network infrastructure engineering
- Forensics Lab, the Navy’s trusted Agent
- Computer Network Defense Service Provider

Electronic  
Warfare  
Innovation/  
Execution Lab

**The National Cyber Range Complex (NCRC) Charleston is a DoD resource that enables us to train like we fight**

supports Cyberspace testing, training, mission rehearsals, cyberspace operations, tactics, science and technology demonstrations and forensics/malware analysis

**We Bring Non-Kinetic Fires to the Fight**

# Delivering globally employed C4ISR systems for operational use, across the Expeditionary Domain

## Expeditionary Systems Integration and Innovation Center (ESIIIC) Bay

C3I Systems integration coupling future capabilities, evaluation and operational assessment of holistic value for mission capability. *Ex: Island Marauder evolution*

## Marine Air Defense Integrated System (MADIS) C2 in Hostile EMS Environment

*Ex. Network on the Move as a "Force Multiplier", Military GPS User Equipment (MGUE)*

## Expeditionary Advanced Base Operations

### ■ Networking on the Move (NOTM)

- provides the Marine Air-Ground Task Force with a robust, over-the-horizon / beyond line-of-sight, digital command and control capability while on-the-move and at-the-halt.
- NOTM-Ground Combat Vehicle Engineering, Production, Fielding and Cybersecurity
- Networking and Communications Architecture Development

### ■ USMC's "Intel Lab"

- Marine Corps Systems Command places explicit trust/confidence in NIWC Atlantic's engineering for the vast majority of their Intel systems

We enable freedom of maneuver across all warfighting domains.

# Enterprise IT & Business Systems

Leading Network Modernization and Digital Transformation Across the Naval Enterprise

**MyNAVYHR**  
Serving Sailors 24/7

**IT Solutions**  
transforming the  
way Sailors and  
their families  
receive support

**MCBOSS**  
Marine Corps  
Business Operations  
Support Services  
To rapidly build,  
deploy, and improve  
apps and deliver data.

**MCBOSS**  
Anywhere on the network, any mission

**F flank Speed**  
Digital transformation  
across the Naval  
enterprise

## Enterprise DevSecOps

DevSecOps/shift left — Agile Development/go fast — Continuous ATO — Naval DevSecOps Platform — Marine Corps Business Operations Support Services (MCBOSS)

## DON and DOD Enterprise Network Modernization

Marine Corps Enterprise Network (MCEN) — Defense Health Enterprise IT and Software Solutions — Flank Speed — Naval Identity Service — Logistics IT Services — Navy Enterprise Service Desk

## Easing Warfighter Challenges at Home and Improving Fleet Readiness at Sea

MyNavyHR — Defense Health Systems

Conceive, Develop and Provide Value

# Decision Intelligence Focus

to turn data into better actions at scale

Using Data for an  
**Advantage on the Battlefield**

Using Data to  
**Improve DoD Management**

Using Data to  
**Inform Decisions at Any Scale**

“The Naval Service will partner, persist, and prevail across the competition continuum employing Integrated All-Domain Naval Power ... by expanding information and decision advantage”

– *Tri-Service Maritime Strategy*

**Revolutionize Naval Decision-Making for competitive advantages across our missions**

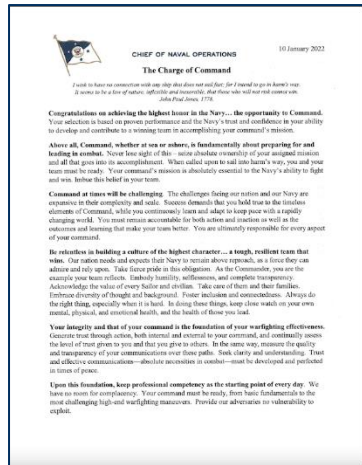

# Urgency to move faster, take advantage of Innovation and Advancing Technologies

“History shows the navy which adapts, learns, and improves the fastest gains and enduring warfighting advantage. The essential element is fostering an ecosystem — a culture — that assesses, corrects, and innovates better than the opposition.” --- Admiral Michael Gilday, Chief of Naval Operations

A call to action for every Navy leader to apply a set of Navy-proven leadership and problem solving best practices that empower our people to achieve exceptional performance.

The Charge of Command  
CNO's expectations

Get Real Get Better  
CNO's call for action

# Collaborate — Innovate — Go Fast

**IWRP Advancing Naval  
Information Warfare**

## Through Rapid Prototyping on a Global Scale

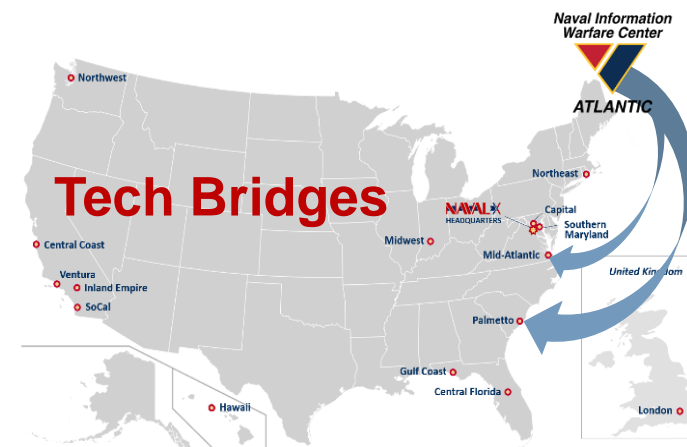

Mission to foster collaboration between Government, Industry and Academia to identify, develop and demonstrate the enabling technologies necessary to enhance the Navy and Marine Corps mission effectiveness in the field of Information Warfare.

- **\$1B Total Approved Ceiling**
- **125 Prototypes (\$410.4M) awarded as of 4/1/2022**
  - 61% (76 out of 125) awarded to Nontraditionals
- **13 Production (\$637.5M) awarded as of 4/1/2022**
- **\$3.3M Average Prototype Award**
- **51 Industry Day & CMF Events**

**NavalX serves as DON workforce "super connector," focused on scaling nontraditional agility methods across the regional and DON workforces to solve dual-use technical challenges.**

The approach is to connect to pockets of excellence to capture and scale the methodologies being employed, increasing awareness of cross-DoD and external successes, lessons learned, and subject matter experts.

**Regional naval innovation ecosystems centered around the NIWC Atlantic labs that support greater collaboration with academia, States, and industry on projects with Naval Information Warfare relevance**

### News Story:

[Colleagues, Partners of NIWC Atlantic Called to 'Front Lines' of Cyber – NIWC Atlantic \(navy.mil\)](#)

# Advanced Naval Technology Exercises

- ▼ Ship to Shore Maneuver Exploration and Experimentation (S2ME2)
  - FVT, FET, 2 projects in attendance
- ▼ Urban 5th Generation Marines (U5G)
  - FVT, FET, 4 projects in attendance, 2 Focus Area Leads (C2, UxS), 25 people
- ▼ Fight the Naval Force Forward (FNFF)
  - West – 2 Focus Area Leads (C2, UxS), 15 Assessors
  - East – Huge support, 10 projects, 3 Focus Area Leads (C2, Comms, UxS), 50+ engineers, 15 assessors
- ▼ Naval Integration in a Contested Environment (NICE)
  - NR&DE Lead, FVT, FET, Commercial Solutions Opening (CSO), 9 projects, 4 Focus Area Leads
- ▼ AINet ANTIX
  - Identify, develop, assess, and integrate Science and Technology (S&T) in support of project Overmatch (OM)
- ▼ Cyberspace Defense in Denied, Degraded and Disconnected Environments ANTIX
  - Develop technology informed TTPs to support afloat operators from ashore

# The Economic Impact of NIWC Atlantic

## Moore School of Business economic study Sept. 2019

### NIWC Atlantic in Charleston, SC

- ▼ \$2.5 billion total economic activity
- ▼ \$1.1 billion labor income for SC
- ▼ 16,834 jobs
  - Average annual wage \$63,298
    - 47% above state average
- ▼ ~ 65% of workforce employed in scientific and computer related professions, largest category Engineers
  - Employs 78.2% of all electronics engineers in the CHS region, 28.2% in SC
  - 64.1% of workforce is engaged with aspects of cybersecurity,
    - 33% of the CHS cybersecurity sector
- ▼ Defense contractors serve as the primary supply chain for NIWC Atlantic
  - Contractors report that 58.5% of their total business operations are tied to NIWC Atlantic

### NIWC Atlantic impact in the U.S.

- ▼ \$6.8 billion total economic activity
- ▼ \$2.8 billion in labor income
- ▼ 39,202 jobs

#### Largest Economic Impacts outside of SC

Virginia	\$1.2B
Maryland	\$125.3M
Louisiana	\$108.9M
Florida	\$65.7M
Washington, DC	\$59.1M

NIWC Atlantic serves as a critical element of Charleston's economy and will continue to be key ingredient for Charleston's future economic development.

# Cultivating the Next Workforce & Engaging with our Communities

## Cultivating the Next Workforce & Engaging with our Communities

- Career Fairs
- Robotics
- GIS
- Palmetto Cyber Summer Camp
- Girls Day Out Summer Camp
- STEM Mobile Apps
- Summer Interns

## FY21 Community Impact & Volunteerism

- 80,000+ Students Served
- 300+ Volunteers
- 1,500+ Total Hours\*
- 119 First Robotics Teams
- 11 Educational Partnership Agreements

BSA Engagement — Career & Science Fairs — Cyber Defense Competitions — Cybersecurity Summer Camp — FIRST Robotics Leagues — Geospatial Information Systems (GIS) — Girls Day Out — Groundhog Shadow Day — Feed the Feds Food Drive — Habitat for Humanity — Virtual Job Shadows — Junior Achievement — Lowcountry Youth Services — Navy Family Services — PI Day — SeaPerch — Splash into Summer — STEM Camps & Festivals — STEM Mobile Apps — Student Internships — Toys for Tots Campaign — Trident Day of Caring — VA Homeless

# Return to the Workplace

- ▼ We will not be making rapid changes to onsite work presence
- ▼ We will ensure our plan is in alignment with DoD and Naval policy and guidance but also make full use of local authorities provided by these policies and guidance (telework waivers, remote duty station, etc.).
- ▼ We will create a return to work plan that ensures we continue to meet mission requirements while maximizing telework to the fullest extent possible.
- ▼ We will ramp-up onsite presence to enhance connectedness/team-building while retaining workforce flexibility.

## ▼ What we know today

- NAVWAR Telework policy for all employee to be scheduled in the worksite a minimum of two times per pay period will be reinstated on 24 Apr 2022
- NIWC Atlantic's ED has authority (can be delegated one level) to grant temporary waivers based on COVID hardship
- NAVWAR is planning on issuing Local Remote Guidance sometime late Apr 2022

## ▼ What we are doing today

- Bringing the workforce back into the workplace for intentional purposes
- Processing temporary telework waivers
- Adjusting employee reporting schedule based on mission needs

# COVID-19

## DOD and CDC Guidance

- ▼ Consolidated DOD COVID Guidance releases into one document 04 April
  - Document can be updated by section as needed
- ▼ DOD using CDC COVID-19 Community Levels to promulgate precautions
  - Community Levels determined weekly by county using:
    - Hospital beds being used for COVID
    - COVID hospital admissions
    - New COVID Cases
- ▼ Physical Distancing required as best possible regardless of CDC Community Level

<b>LOW</b>	<ul style="list-style-type: none"> <li>▪ Masking <b>NOT</b> required on DOD spaces</li> <li>▪ Testing <b>NOT</b> required for unvaccinated personnel for onsite presence</li> <li>▪ DOD sponsored meetings over 50 personnel allowed without SECNAV approval</li> </ul>

- 8.0 Corp. Ops:** Command Ops.

### Contract Strategy supports Technical Focus Areas Developing today for the warfighter needs of tomorrow and beyond.

- Artificial Intelligence:** 5.6 is the Command lead. Strategy is to JAIC contract vehicles to acquire specialized skills in this TFA.
- Assured Communications:** 5G BAAs and IWRP OTs
- Cloud Computing:** Our primary strategy for stand alone Cloud services is to utilize the HQ Cloud BPA. Owner in the command is 5.4/5.5. Dec 2020 Navy Cloud Policy coming out of ASN RDA/DON CIO - prohibition on buying cloud services as part of a larger systems integration or support services contract - We can issue orders against any of the existing cloud vehicles, but we'd have to get PEO Digital's approval if we wanted to issue our own solicitation for a new vehicle.
- Cybersecurity:** Provides protection from unauthorized use of and/or defends electronic data, hardware, software from disruption or of the services they provide. Appropriate to acquire cybersecurity embedded in most of our acquisitions. Historically we have had a Cyber services contract (CME) and a Cyber solutions contract (CMS). Do we need to continue those? Owner in the command is 5.9 - developing there own support contract action.
- DevSecOps:** Refers to replacing siloed Development, Security and Operations to create multidisciplinary teams that collaborate with shared and efficient practices and tools. Many times these services are embedded in bigger contract actions as well. Strategy could change to modular contracting if the requirements are separated into their own action (small and more agile - iterative). Owner in the command is 5.4.
- Mobility:** Provide Wireless Technology and enterprise access for the warfighter to engage with a mobile environment and applications, anytime, anyplace. Owner in the command is 5.5. 5G BAAs?
- Model-Based Systems Engineering (MBSE):** Technologies used to support the development, management and application of virtual constructs of varying fidelity across the spectrum of systems engineering. Appropriate to acquire as an embedded requirement in other actions. 5.2 is the owner for the command.
- On-Demand Manufacturing:** Produce products and/or components, when or as they are required at the point of use, using additive and/or traditional manufacturing methods. 4.7 is the owner for the Command. Corporate Production or CMS strategy?

# Managing Contract Strategy for the Future

- ▼ Information Warfare Research Project (IWRP) 2
- ▼ Command Strategy
  - Ensure Contract Strategy supports Technical Strategy
    - 5G, Cloud, MBSE, DEVOPS, and NC3
- ▼ Category Management
  - Common goods/services vs DoD-centric
  - Best In Class (BIC) – Tier 3
  - SeaPort – Agency-wide Tier 1 Solution
- ▼ Req't to Consider SeaPort (NMCARS 5237)
  - To satisfy competitive service requirements
  - D&F required to negate use of SeaPort
  - >SAT; limited exceptions
- ▼ SAC vs MAC
  - D&F required to award single source task/delivery order contract >\$100M (HQ)
- ▼ Outsourcing due to Budget Constraints
- ▼ Sea Enterprise GIC Administration

## 8 Technology Focus Areas to Achieve Technology Goals

Technology Strategy and TFA analysis drives work acceptance and lab/facility infrastructure allocations and tools.

**Artificial Intelligence:** Provide warfighters with analytics-driven, data-informed, and technology-empowered capabilities to drive decision advantages and optimal mission outcomes.

**Assured Communications:** Addresses the demand for resilient, and sometimes covert, wired and wireless communications in degraded and/or denied environments.

**Cloud Computing:** IT modernization and digital transformation for resilient infrastructure, platform and software services.

**Cybersecurity:** Provides protection from unauthorized use of and/or defends electronic data, hardware, software from disruption or of the services they provide.

**DevSecOps:** Refers to replacing siloed Development, Security and Operations to create multidisciplinary teams that collaborate with shared and efficient practices and tools.

**Mobility:** Provide Wireless Technology and enterprise access for the warfighter to engage with a mobile environment and applications, anytime, anyplace.

**Model-Based Systems Engineering (MBSE):** Technologies used to support the development, management and application of virtual constructs of varying fidelity across the spectrum of systems engineering.

**On-Demand Manufacturing:** Produce products and/or components, when or as they are required at the point of use, using additive and/or traditional manufacturing methods.

# IWRP Compared to Other Navy Consortiums

## ▼ IWRP – NAVWAR

(April 2022)

- 125 Prototype Awards
- \$410.4M Ceiling Awarded
- Average \$3.3M
- \$637.5M Awarded in follow on Production

## ▼ NSTIC – NSWC Dahlgren

(April 2022)

- 36 Prototype Awards
- \$368.8M Ceiling Awarded
- Average \$10.2M

## ▼ UTIC – NSWC Newport

(April 2022)

- 70 Prototype Awards
- \$365.9M Ceiling Awarded
- Average \$5.2M

# Commercial Solutions Opening (CSO)

- ▼ Commercial Solutions Opening: Originally started as a pilot program and was made permanent with 2022 legislation. It is available to quickly access innovative commercial technologies. It offers simplified contract terms and fast-track vendor selection timelines to attract start-up companies and those new to the Federal marketplace.
- ▼ NIWC Atlantic CSOs:
  - NICE ANTX – evaluation complete – working awards
  - Navy e-GRC Tools - currently in evaluation
  - Cyber ANTX – recently closed and in initial evaluation – demonstrations to be in Sept.
  - 3 Path MONTE (Optical) ANTX – should be released in next couple of weeks – demonstrations to be in August (planned)

## 2373 Authority

- ▼ Beginning use of the USC 2373 authority to procure items for experimentation purposes. Can buy equipment in limited quantities for experimental purposes for certain technical areas.
  - “The Secretary of Defense and the Secretaries of the military departments may each buy ordnance, signal, chemical activity, transportation, energy, medical, space-flight, and aeronautical supplies, including parts and accessories, and designs thereof, that the Secretary of Defense or the Secretary concerned considers necessary for experimental or test purposes in the development of the best supplies that are needed for the national defense.”
- ▼ To use this authority, you will need to provide a description of the need for these supplies for experimental/test purposes, including, most importantly “the warfighting capability gap being addressed, in the Form of a Determination and Findings (D&F).”

# More Industries Now Open to WOSB Set-Asides

## Eligible NAICS for the Women-Owned Small Business Federal Contracting program ([sba.gov](https://www.sba.gov))

- The Small Business Administration (SBA) has significantly expanded the roster of industries eligible for federal contract set-asides under its women-owned small business (WOSB) contracting program.
- A recent agency assessment concluded WOSBs were underrepresented in the federal marketplace for hundreds of North American Industry Classification System (NAICS) sectors. In response, SBA expanded the NAICS codes eligible for WOSB and economically disadvantaged WOSB (EDWOSB) set-asides from 444 to 759 — a 70 percent increase.
- “This ... [expansion of] the WOSB program will help more women seize potentially hundreds of millions of dollars more in federal procurement opportunities across 92 [percent] of all federal small-business contract spending,” SBA Administrator Isabella Casillas Guzman says.
- The changes apply to new solicitations and are effective immediately.

# Updated Small Business Size Standards

## Federal Register :: Small Business Size Standards: Professional, Scientific and Technical Services; Management of Companies and Enterprises; Administrative and Support and Waste Management and Remediation Services+

- The U.S. Small Business Administration (SBA) is increasing its receipts-based small business size definitions (commonly referred to as “size standards”) for North American Industry Classification System (NAICS) sectors related to Professional, Scientific and Technical Services; Management of Companies and Enterprises; Administrative and Support and Waste Management and Remediation Services.
  - 541330 Engineering Services \$22.5M
  - 541330 (Exception 1) Military and Aerospace Equipment and Military Weapons \$41.50M
  - 541330 (Exception 2) Contracts and Subcontracts for Engineering Services Awarded Under the National Energy Policy Act of 1992 \$41.50M
  - 541330 (Exception 3) Marine Engineering and Naval Architecture \$41.50M
- Effective 2 May 2022

# State of the Defense Industrial Base

THE WHITE HOUSE

## Fact Sheet: Department of Defense Releases New Report on Safeguarding our National Security by Promoting Competition in the Defense Industrial Base | The White House

- Mergers and acquisitions (M&As) are further constraining the defense industrial base (DIB) and dampening the competitive forces that spur innovation and moderate pricing, the Department of Defense (DoD) warns.
- In a report released this week, DoD noted how the breadth of the DIB has shrunk drastically — for example, falling from 51 aerospace and defense prime contractors in the 1990s to merely five today — imperiling both economic and national security and “leaving DoD increasingly reliant on a handful of companies for critical defense capabilities,” a fact sheet explains.
- Lack of competition can create myriad negative effects: “It may leave gaps in filling [mission] needs, remove pressures to innovate to outpace other firms, result in higher costs to taxpayers as leading firms leverage their market position to charge more, and raise barriers for new entrants,” the report cautions. Small businesses especially punch above their weight in contributing to government needs: They not only constitute the future generation of suppliers but produce 16.5 times the patents larger firms do. Yet their ranks have dwindled by 40 percent in the last decade, and without decisive remedial action, DoD stands to lose another 15,000 in the next 10 years.

# State of the Defense Industrial Base (Cont.)

To reverse these trends, the report proposes five actions:

- **Strengthen merger oversight**, with more stringent review of proposed M&As and collaboration with the Federal Trade Commission (FTC) and Department of Justice (DOJ) when a merger threatens defense interests.
- **Address intellectual property (IP) limitations** by identifying IP needs early in acquisition planning, incorporating IP as an evaluation factor in competitive awards and negotiating point for sole-source awards, and selecting vendors willing to provide the government with needed IP deliverables and rights.
- **Attract new DIB entrants** with small business outreach and support; flexible acquisition authorities like other transaction (OT) authority and commercial solutions openings (CSOs); and cross-sector engagement methods such as hackathons, pitch events, and prize challenges.
- **Increase opportunities for small businesses**, particularly in priority industrial base sectors, including making small business capabilities more visible throughout the enterprise, assessing policies and regulations to reduce barriers to working with DoD, and holding senior executives accountable for incorporating small business objectives into performance planning.
- **Implement sector-specific supply chain resiliency plans** for priority areas, including energy storage and batteries, strategic and critical materials, and microelectronics.
- “DoD is committed to pursuing these principles throughout its procurement and sustainment processes ... efforts to increase competition will deliver benefits for cost, schedule, quality, performance, innovation, and industrial capacity,” the report states.

# State of the Defense Industrial Base

## DOD Wants to Shepherd Small Business Innovators

MARCH 8, 2022 | BY C. TODD LOPEZ, DOD NEWS

<https://www.defense.gov/News/News-Stories/Article/Article/2958863/dod-wants-to-shepherd-small-business-innovators/>

"A lot of the small businesses, they have no idea who to even go talk to ... it's this giant wall in front of them. And, hopefully, once we get our website up and running, they can be able to Google and input whatever product that they have to help them figure out who to go talk to."

## New Pentagon strategy to bring in small businesses coming soon

BY JOE GOULD, MARCH 7, 2022 | DEFENSE NEWS

<https://www.defensenews.com/congress/2022/03/07/new-pentagon-strategy-to-bring-in-small-businesses-coming-soon/>

"how to do make things easier from a structure, engagement and a policy perspective."

## The problems with the defense-industrial base aren't about the contractors

BY DAVID J. BERTEAU FEB 16, 2022 | DEFENSE NEWS

<https://www.defensenews.com/opinion/commentary/2022/02/16/the-problems-with-the-defense-industrial-base-arent-about-the-contractors/>

"Increasing new entrants and opportunities for small businesses"

## The Defense Industrial Base's Vital Signs Aren't Looking Good

FEBRUARY 4, 2022 | BY ERIC TEGLER, FORBES

<https://www.forbes.com/sites/ericteglar/2022/02/04/the-defense-industrial-bases-vital-signs-arent-looking-good/?sh=5539478f2101>

"U.S. technology gaps versus peer competition, industry competition, relative DIB profitability, and political and regulatory action/inaction" have contributed to fragility of the DIB"

## The Benefits of Increased Equity in Federal Contracting | The White House

- “Less than 10 percent of federal agencies’ total eligible contracting dollars typically go to [SDBs], a category under federal law for which Black-owned, Latino-owned, and other minority-owned businesses are presumed to qualify,” the White House explained. “Moreover, while women own roughly 20 percent of all small businesses economy-wide, less than 5 percent of federal contracting dollars go to women-owned small businesses.”
- Accordingly, the Office of Management and Budget (OMB) tasks agencies with five actions:
  - Establish agency-specific fiscal year (FY) 2022 contracting goals in coordination with the Small Business Administration (SBA) that direct at least 11 percent of cumulative federal contract awards to SDBs
  - Assess and adjust category management (CatMan) practices to increase opportunities for SDBs and other socioeconomic small businesses, including updating agency policies to reflect new revisions to OMB’s March 2019 [CatMan guidance](#) (detailed in an attachment to the memo)
  - Participate in efforts by OMB, SBA, the General Services Administration (GSA), and other federal organizations to amplify small business participation and bring new contractors into the federal marketplace
  - Set small business contracting goals for Senior Executive Service (SES) officials who oversee acquisition workforce programs
  - Ensure agency small business contracting offices have direct reporting lines to senior leadership

# America's Seed Fund Startup Expo

- ▼ America's Seed Fund Startup Expo enables entrepreneurs with technology developed through the SBIR/STTR programs an opportunity to present their innovative ventures to leading members of the broader innovation ecosystem and the American Public.

- ▼ America's Seed Fund Startup Expo | [SBIR.gov](https://www.sbir.gov)

**Objectives:**

- To showcase innovative small businesses supported by America's Seed Fund
- To connect these startups with resources that enable their ability to scale, grow, and thrive
- To raise public awareness for commercialization of critical innovation necessary for continued competitiveness in the global marketplace
- To amplify and support entrepreneurship that creates jobs and drives forward the U.S. economy
- The inaugural America's Seed Fund Startup Expo will be a virtual event on Wednesday, May 25, 2022, from 12:30 - 4:30 PM EDT. The half day will include the winning presentations from up to 12 small businesses utilizing SBIR/STTR derived innovation and moderated discussions on AgTech and Food Security, Climate and Energy, National Security and Defense, and Supply Chain Resiliency.
- The event is open to the public.

## ▼ How to access the SBDA's Digital Resource Library

- Small businesses can navigate the SBDA national members' tools and resources through the library for more personalized learning by visiting [smallbusinessdigitalalliance.com](https://smallbusinessdigitalalliance.com). The library will be updated monthly with new resources throughout the year.

## ▼ Resources available to small business owners through the SBDA library include:

- Tools geared toward establishing a digital presence, reaching new markets, managing growth, finding and retaining talent, improving operations, expanding customer bases, e-commerce, and raising capital;
- Live workshops and curricula tailored to business leaders' needs;
- Development and support in accelerating online and social media strategies; and
- Trainings to assist in accessing and utilizing digital tools provided by national members.

# Training and Outreach

NIWC Atlantic supports the vision of the Department of Navy Office of Small Business Programs (OSBP) to influence change and create a culture of small business inclusiveness across the entire acquisition lifecycle to provide better, faster and more affordable solutions.

NIWC Atlantic OSBP leverages the innovation, agility, responsiveness and competition that small businesses bring to the fight. The motto, "Small Business - The First Option" is the very essence of what we do as acquisition professionals by fostering acquisition opportunities where small businesses can best support Sailors, Marines and their families.

## POCs
